1. Ted, so many, so many, so need so much help, so much help, so much help that I want to give them, I want to give them, I want to give them, by telling them directly, imparting Me, revelation and wisdom into them—and by relationshipping them with others in My body who love Me and want to honor Me, and honor each other, and have motives pure for propelling Me and Mine, in Me and Mine.

2. Oh, tell this message and propel it into My Mine, My body, My soldiers who are sitting on the sidelines watching to see what will transpire and whether they will play a part in the end time drama that I alone will orchestrate.

3. I am Me and have My Mine who are My people who seek Me and crawl off the altar not, who shun Me not, and set not boundaries on Me in them or their personal circumstances. These are powerful people Ted, and must be implored to move out into action and scared—not be. Risk take, and reward receive.

4. Oh Ted, relationships, relationships, relationships. Teach My people that I teach through My people and all the things I teach are not in lecture halls with orators or teachers, but My body learning from My body in experiences of life, experiencing life, in life and fullness of life.

5. I like to teach through experience Ted. I like to teach My people through My people—My people who often are the least suspected as being “teachers” in the eyes of the learner—at least, the intended, targeted learner, who may or may not be open to the teacher who is not a teacher, who I use and utilize and speak through to transmit Me and My wisdom.

6. So many are so shut into themselves that they cannot see My ways or hear Me unless they think I come through a robed one, or an authoritarian figure.

7. Ted, I use all My body and I use all My body all the time to enhance the efforts, unity and productivity of My body—all that will let Me—that is. So closed, so little, are so many, wanting to do only few, specific things, the exact way they have it in their mind that they want to do it, or hear it, from others—so shallow, so shallow, so shallow.

8. Oh Ted, write, write profusely and learn how to get more down faster and share Me and My people and learn how to grasp their hearts and touch it and take it and mold it and nourish it and mature it for Me, for Me, for Me.

9. I am propelling you in new arenas, in arenas heretofore unplanned, unplanned in your thinking—but of Me, of Me, of Me.
